Schilling Robotics, LLC Sells UHD™ ROVs to OceanWorks International, Inc.

Davis, California – March 4, 2009, Schilling Robotics, LLC announced the sale of two (2) new UltraHeavy-Duty (UHD™) Remotely Operated Vehicles (ROV) to OceanWorks International, Inc. OceanWorks will supply the UHDs as part of two systems that include OceanWorks' new electric drive ROV winches and handling equipment to a new international operator. The 150 horsepower ROVs will be paired with Schilling's XE™ tether management systems, rated for operations up to 4,000 meters.

Chosen for their leading-edge technology, Schilling will manufacture for the customer's aggressive expansion plans in their international ROV, diving, and atmospheric diving suit (ADS) operations. The UHD™ systems will be delivered to OceanWorks in September 2009. Schilling and OceanWorks will be providing training and installation support for the UHD™ systems.

"As Schilling continues to expand its global presence to support new and existing customers, the key will be to align with strong partners that are familiar with its target regions," says Jason Stanley, vice president of global sales for Schilling Robotics. "OceanWorks' expertise and relationships in the northern regions will allow both companies to offer comprehensive product and service packages to ensure that customers are successful with their aggressive growth plans throughout the coming years."

"OceanWorks is pleased to be acting as the primary contractor for these ROV systems to one of our important international clients. The winning combination of OceanWorks' handling equipment and Schilling's world-class ROVs exceeds that of our customer's requirements," says Glen Viau, vice president and general manager for OceanWorks.

About OceanWorks

OceanWorks International, Inc. is a dynamic, privately held subsea technology company that specializes in manned and unmanned subsea work systems, fabrication services, and equipment for key international marine industries, including Oil & Gas, International Military, Scientific, Telecom, Marine Salvage and Construction, and Renewable Energy markets. Further information about OceanWorks can be found at <http://www.oceanworks.com>.

About Schilling

Schilling Robotics, LLC is a global, deep-ocean robotics company, founded in 1985. Its customers include offshore oilfield equipment and service providers, such as Acergy UK Ltd, Bourbon Subsea Services, Expro North Sea Ltd, and Oceaneering International. Schilling is headquartered in Davis, California, and has regional offices in Houston, Texas and Aberdeen, Scotland, with a total staff of more than 300. In late 2008, FMC Technologies, Inc. acquired at 45% interest in Schilling Robotics, LLC for \$116 million. FMC Technologies, Inc. (NYSE:FTI) is a leading global provider of technology solutions for the energy industry. FMC Technologies designs, manufactures, and services technologically sophisticated systems and products, such as subsea production and processing systems, surface wellhead systems, high pressure fluid control equipment, measurement solutions, and marine loading systems for the oil and gas industry. Further information about Schilling Robotics can be found at www.schilling.com.
